

FilmArray* Meningitis/Encephalitis (ME) Panel

- **The Right Test, The First Time.**

Syndromic testing is a symptom-driven broad grouping of probable pathogens into one, rapid test that maximizes the chance of getting the right answer in a clinically relevant timeframe.

- **14 TARGETS IN 1Hr : FAST ACCURATE..... COMPREHENSIVE.....**

Bacteria

1. *Escherichia coli* K1
2. *Haemophilus influenza*
3. *Listeria monocytogenes*
4. *Neisseria meningitides*
5. *Streptococcus agalactiae*
7. *Streptococcus pneumoniae*

Viruses

1. Cytomegalovirus (CMV)
2. Enterovirus
3. Herpes simplex virus 1(HSV-1)
4. Herpes simplex virus 2 (HSV-2)
5. Human herpesvirus 6 (HHV-6)
6. Human parechovirus
7. Varicella zoster virus (VZV)

Yeast

1. *Cryptococcus neoformans/gattii*

SAMPLE TYPE : Cerebrospinal Fluid (CSF)

- **Overall Performance of the FilmArray ME panel:**

94.2% Sensitivity 99.8% Specificity
